RE: A. L. Taylor Disposal Site - Bullitt County

Dear Sir:

A stipulation to quash the subpoena ducus tecum that would formally involve your company in the present administrative action is in process. As we discussed, the first step leading toward solution to the abandoned waste disposal site formerly owned and operated by Mr. A. L. Taylor is to assess as accurately as possible the quantity and characteristics of the waste material. Since you have agreed to cooperate in that endeavor, we solicit the following information:

1. An explanation of the contractual arrangement your company maintained with Mr. A. L. Taylor or Mrs. Nell Taylor individually or doing business as Taylor Hauling or Taylor Drum Cleaning Service (hereinafter all included under the name "Taylor Hauling"), to include copies of all contracts, memoranda, agreements, letters, etc., that would touch on, clarify or explain the arrangement and/or relationship.
2. A description of the waste handled by Taylor Hauling, generally, and chemical analysis for such waste as is available or can be prepared by this time.
3. A detailed explanation of your waste stream and production methods in sufficient detail that the chemical characteristics of the waste may be ascertained by Department personnel during the entire time of any arrangement with Taylor Hauling. Please give special attention to any waste which could have unusually dangerous consequences if mishandled.

10951364

000100

4. A description of the procedure(s) which your company employs in separating, designating, packaging, labeling, identifying and shipping the various forms (i.e. liquid, solid, mixture) of waste turned over to Taylor Hauling for disposal or other processing.
5. A compilation of the available shipping documents (dray tickets, invoices, payment records) and list amounts of designated types of waste hauled (by Taylor Hauling) for each year. Please forward copies of all documents that you used to prepare the compilation.
6. Copies of all records of payments made to any party for (a) haulage, (b) disposal by landfilling, and/or (c) haulage for incineration or recycling when such activity involved Taylor Hauling, either in a contractual relationship with you or anywhere in the disposal stream as may be known to you.

As you are doubtless aware, we need to develop long and short term strategies in order that potential significant environmental impacts may be reduced. This obviously depends on our assessment of the nature and extent of the problem; which in turn largely depends on the information you provide, and a comparison of your information with A. L. Taylor's records.

Please respond to this request within ten (10) days.

Sincerely,

Eugene F. Mooney  
Secretary
